Catalog notes

Specifications are transcribed and professionally restated from the supplied product catalogs. Not specified means the source does not provide a reliable value. Confirm pending specifications, battery fitment, kit contents and packing details before placing an order. Product dimensions are not packaging dimensions. Listed weights retain the source basis; gross packed weights are not assumed. Voltage values are retained as stated; nominal voltage and maximum battery voltage are not treated as interchangeable.

SY- prefixes are assigned ShengYi catalog references. A/B suffixes distinguish entries with the same model reference; these suffixes are internal identifiers and do not imply interchangeability. Different source entries are kept separate, including entries with matching core ratings but different or missing details.

Bare tool, 1 battery + 1 charger and 2 batteries + 1 charger are proposed quotation options for removable-battery tools, subject to confirmation; the supplied catalogs do not establish these as confirmed sales kits. Each option has its own row. Battery capacity, charger rating, accessories, packaging and gross weight must be agreed for each configuration. Corded tools, integrated-battery products and accessories use appropriate configuration rows instead.

MOQ: 1,000 sets Delivery: 30-45 days OEM/ODM supported

Categories

- Drills: 28 product sections
- Impact Wrenches: 19 product sections
- Angle Grinders: 6 product sections
- Rotary Hammers: 4 product sections
- Blowers: 22 product sections
- Garden Tools: 25 product sections
- Batteries & Chargers: 33 product sections
- Other Tools: 59 product sections

Interface codes IF-01 through IF-08 are neutral ShengYi references preserving distinctions stated in the supplied material. A shared code does not establish cross-voltage compatibility or guarantee physical fit. Exact connector drawings and matched tool/battery/charger combinations must be confirmed.
